Immunization order	Number of animals per antigen	Additional services*
<b>Polyclonal antibodies</b>		
Sheep		IgG preparation from antiserum <input type="checkbox"/>
Rabbit		IgG preparation from antiserum <input type="checkbox"/>
Chicken		IgY preparation from egg yolk <input type="checkbox"/>
<b>Monoclonal antibodies</b>		
Mouse		IgG preparation from cell culture supernatant <input type="checkbox"/>

\*We offer a broad range of additional services (e.g. antibody conjugation). Please contact us for an individual quotation.

<b>Antigen Information</b>		
Name:		
Size: (MW in kDa without tag or number of amino acids for synthetic peptides)		
Origin:		
<input type="checkbox"/> Native origin	<input type="checkbox"/> His-tag	<input type="checkbox"/> GST-tag <input type="checkbox"/> Other:
<input type="checkbox"/> Recombinant	Sequence:	
<input type="checkbox"/> Synthetic Peptide	Concentration:	Volume:      Buffer, additives (if applicable):
Storage temperature:		

**Antigen requirements:**

- Non-toxic (toxin antigens must be inactivated)
- Non-infectious (infectious antigens must be inactivated)
- Presence in physiological buffer (e.g. PBS, TBS), ± pH neutral (6-8)
- NaCl                      ≤ 0.3 M
- Imidazole                ≤ 0.2 M
- Detergents              < 0.2 %
- Urea                        ≤ 1.0 M
- EDTA                      < 0.001 M
- No preservatives (e.g. sodium azide)

**Date, signature:**
